

TapItData

**Tap-based data exchange
— no screens, no setup**

Dan Zwillinger, PhD
Dan@TapItData.com
<https://www.TapItData.com>

The Problem

Today's device-to-device information transfer is ... clunky.

- Requires apps, screens, and menus
- Needs internet or cloud access
- Not always intuitive or secure

Enable
Wi-Fi

Find the app, open the menu,
select the functionality ...

Wait for it
to load ...

READY

Can now
use it ...

The Spark

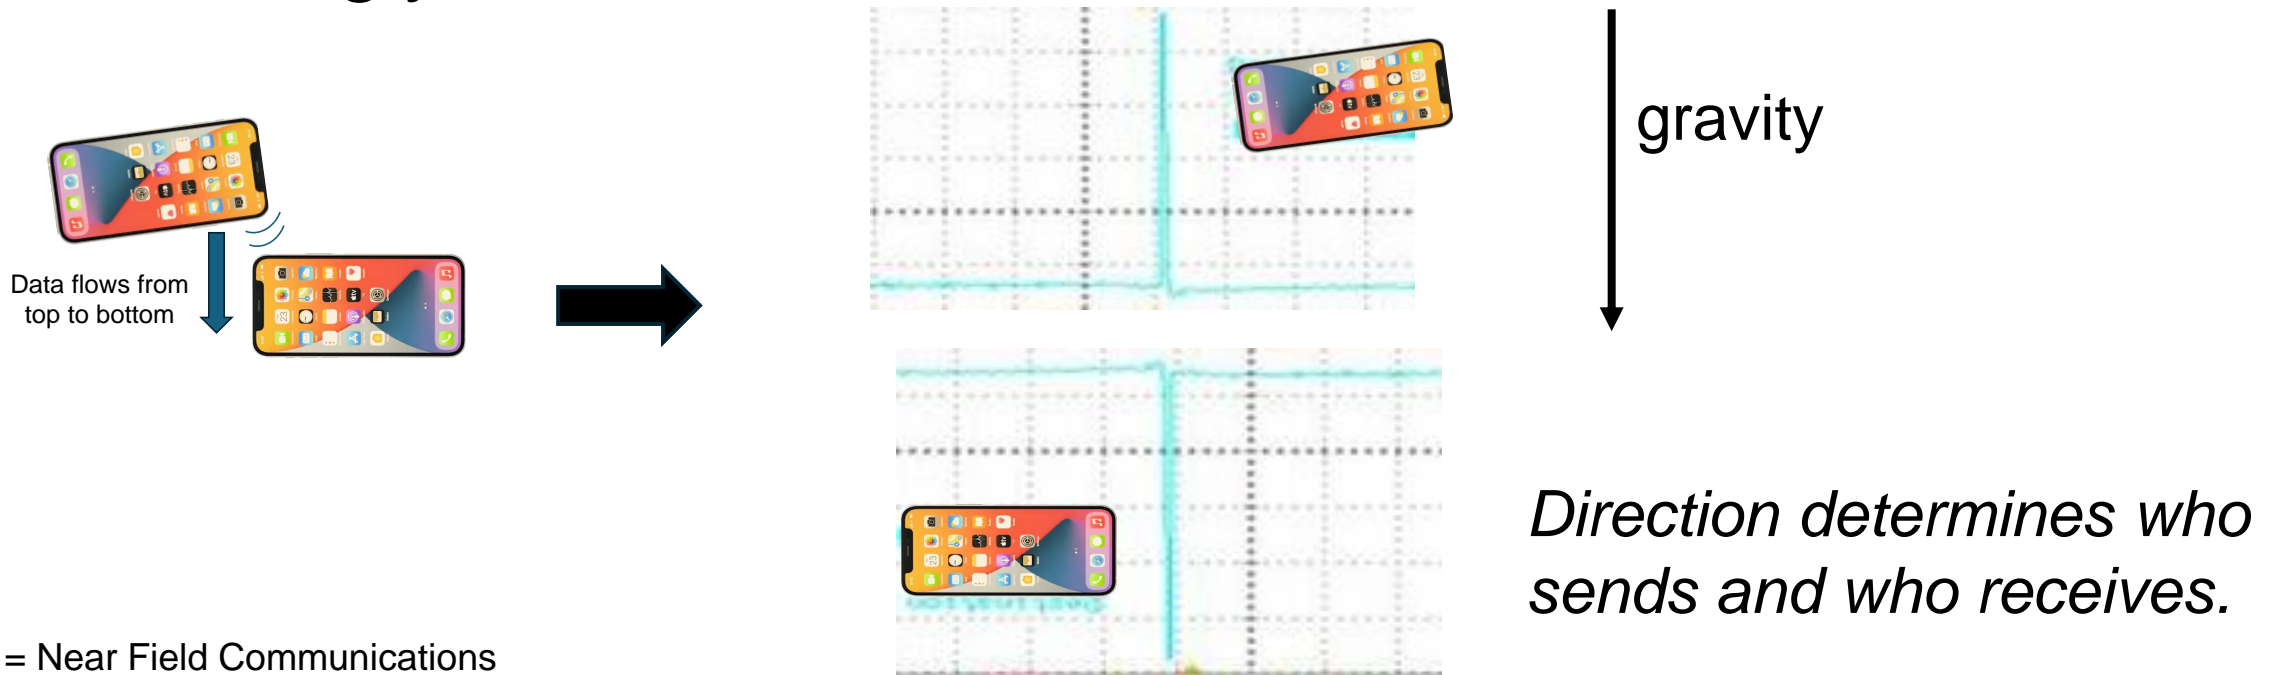

What if two devices could just talk ... by touch?

- No screens. No cloud. No friction.
- Directional and deliberate — *tap and go*.

Introducing TapItData (US patent 12,284,001)

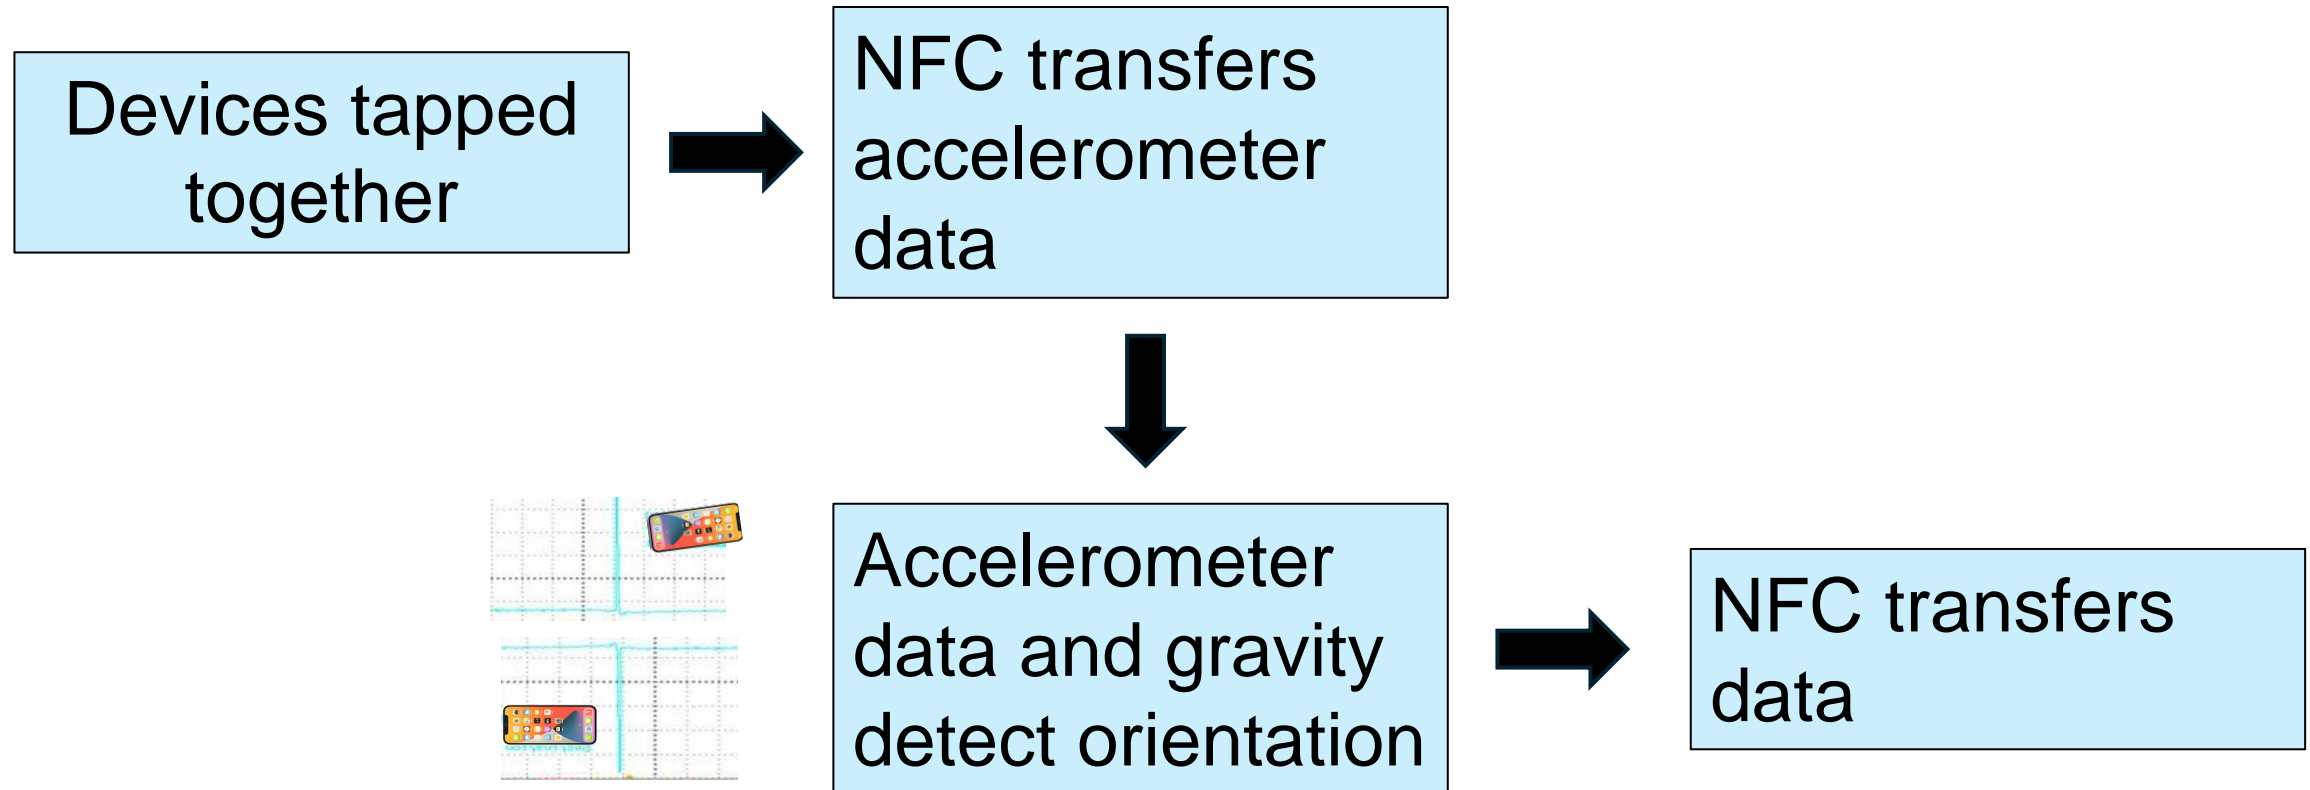

- NFC + accelerometer + gravity = a new way to interact
- Tap two devices: one on top, one below
- TapItData figures out which is which and transfers data accordingly

* NFC = Near Field Communications

How TapItData Works

Behind the Scenes: No UI. Just Physics.

Why **TapItData** Matters

Instant

No menus or login

Offline

No cloud or
internet needed

Intentional

Direction determines
trust & role

Imagine the Possibilities

From daily life to critical missions...

Payment Transfer

Data sharing

Business Card Exchange

Computer Setup

Class Attendance

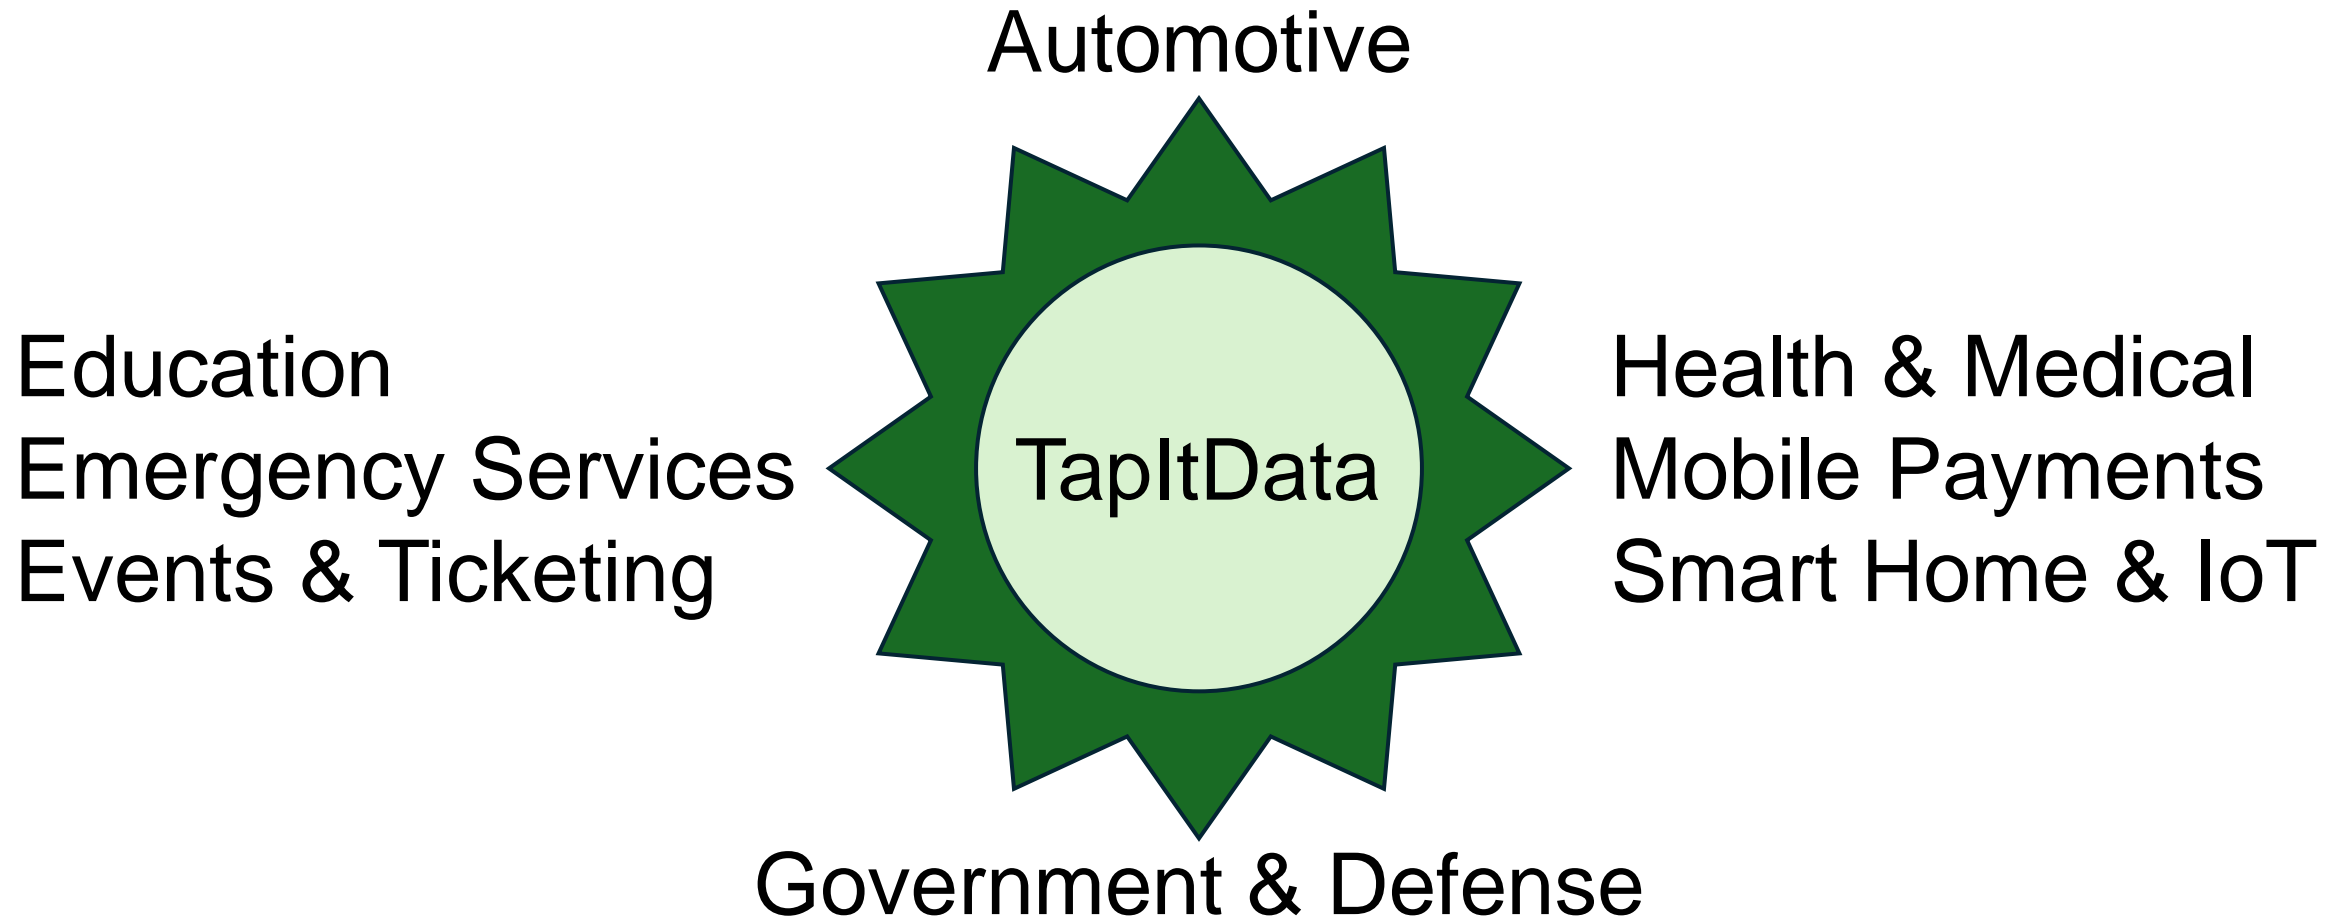

Smart Lock Sharing

Tap → Transfer → Trust

TapItData Across Industries

TapItData can revolutionize...

What Makes TapItData Unique

TapItData vs. Existing Tech

Feature	TapItData	QR Codes	AirDrop	Bluetooth	NFC (Standard)
No Internet Needed?	✓	✗	✗ (setup)	✓	✓
No UI Needed?	✓	✗	✗	✗	✗
No Screen Needed?	✓	✗	✗	✗	✗
Works Offline?	✓	✗	Partial	✓	✓
Tap-Based Initiation?	✓	✗	✗	✗	✓
User Intent Detection	✓	✗	✗	✗	✗
Directional Data Transfer?	✓	✗	✗	✗	✗
Security/Privacy (Physical Proximity)	✓	✗ (visible)	Partial	✗ (pairing)	✓
Speed to Initiate Transfer	⚡ Instant	🕒 Slower (scan + confirm)	🕒 Moderate	🕒 Moderate	⚡ Instant

Who Will Use TapItData First?

Examples of TapItData integration

- Mobile OS feature (Android/iOS)
- Event platforms with instant check-in
- Smart locks and access control apps
- Classroom tools for attendance logging
- Peer-to-peer payment platforms

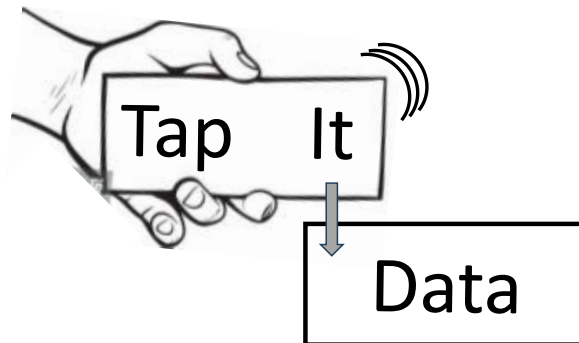

This is just the start...

Call to Action

*What could **TapItData** unlock in your world?*

If your devices could talk by touch, what would they say?
We're looking for partners, developers, and dreamers.

Questions? Ideas? Partnerships?
Let's connect.
